2023/2024

ESCUELA DE MÚSICA

The Brains International School of Music offers children, adolescents and adults, the possibility of starting out in the study of music or deepening their mastery of an instrument.

The philosophy of our work can be summarized in three main aspects.

- » A teaching methodology and attractive repertoires, attending to the particular and characteristic needs of each student.
- » Permanent communication with families to promote and optimize the student's practice at home.
- » The creation of an agenda of concerts and auditions, with the idea of generating short and medium-term objectives that encourage the student in practice.

Foundation offer • NON-ACCREDITED EDUCATION
