

## ESCUELA DE NATACIÓN Y WATERPOLO

The Brains swimming school was started in 1998 as a personal project of the founder of the Brains Schools, MANUEL SANCHEZ SANCHEZ. Don Manuel, cemented his educational criteria on the bases of intellectual and sports education, indulging each of these aspects equally. From this focus students in our Swimming School develop a range of all the sports disciplines that can be practiced in a semi-Olympic pool (25 x 12.5).

We are not a classic swimming school; we utilize the aquatic environment and develop all its possibilities in an environment of friendship and fun.

Regarding our sporting successes, we have Madrid champions, National medallists, world champions, but above all, exceptional athletes and teachers who make our School a great family that enjoys sport.

## POOL SPORTS

- » SWIMMING  
Our goal is to teach new generations swimming with the best possible technique within a work environment based on camaraderie and passion for this sport.
- » ARTISTIC SWIMMING  
What we like the most about this sport is working as a team, fostering friendship and unity among swimmers, enjoying each training session, getting students to always enter and leave the facility with a smile on their face.
- » ADULTS SWIMMING AND OPEN WATERS  
Swimming in open water is a discipline that is increasingly accepted by swimmers. as we all say, "it is swimming in the open air at last". At Brains Swimming School we are always ready for any sporting challenge and when we find challenges as stimulating as those offered by the sea, we just can't refuse.
- » WATERPOLO  
We want each player, in addition to learning the specific techniques of the sport, to find their own passion to build their life project.
